Liam Huynh

Full-Stack Engineer

liamtamh@gmail.com | 647-771-4869 | linkedin.com/liamhuynh | GitHub.com/huynhli | Portfolio

Education

University of Toronto *Expected graduation: June 2027*
Bachelor of Computer Science, Mathematics *Toronto, ON*

Work Experience

Full-Stack Developer | ***Web, Mobile, E2E Testing, CI/CD*** Oct. 2026 – Present
BAREL Technologies Inc. *Toronto, ON*

- Created **10 screens** for a pet technology mobile app, prioritizing customizable UX and minimizing clicks needed to complete actions
- Led implementation of **web and mobile E2E testing frameworks** with IT teams, reducing support requests by **90%** within two weeks
- Built a CI/CD pipeline to automate staging deployments, supporting pre-release validation and reducing deployment risk

Software Developer Intern | ***PostgreSQL, React, Role-based Access Control, GCP, Jira*** Jan. 2026 – Aug. 2026
Geotab *Toronto, ON*

- Developed device administration tooling for telematics fleet management using C# and **React**
- Optimized a PostgreSQL database and REST API using LINQ and keyset pagination, integrating with TanStack Query and Axios to boost **JSON data fetch performance by 66%** for queries of up to 2 million rows
- Implemented **concurrent** device registration using **parallel ActionBlocks, retry and circuit breaker policies**, atomic counters, and cross-worker cancellation, preventing transient failures from terminating batches of registrations up to **100,000 devices**
- Automated accessibility evaluation using **SiteScan and CI workflows**, collaborating on an Accessibility Epic to improve **3 major pages** to meet established W3C accessibility standards
- Designed an **LLM-powered query-to-filter mapper** for devices using Semantic Kernel, prompt engineering, and confidence scoring, achieving up to **95%** query filtering accuracy
- Supported **30+ production releases** using GCP and Kubernetes for deployment management, with Prometheus and Grafana for monitoring and incident resolution

Full-Stack Developer | ***Golang, React (TypeScript), Vitest, Docker, Agile*** Jul. 2025 – Aug. 2025
TBSP Games *Toronto, ON*

- Built and maintained 3 web applications for a video game company using Golang, **TypeScript**, React, HTML, and CSS
- Collaborated across **3 software and hardware teams** in Agile Scrum using Jira, delivering project features **2 weeks ahead of schedule**
- Implemented 20+ tests using **Vitest** and parallel execution, improving unit and E2E test runtime by 5x and ensuring production-ready pull requests by following a Test Driven Development framework

Projects

similarSongs - Song Recommendations API Hub | ***Python, React, Third-Party APIs, REST***

- Processed MusicBrainz and AcousticBrainz **ML data** for **React** interfaces, enabling exploration and comparison of music metadata
- Built 10+ **RESTful** endpoints, integrating **Spotify**, **Last.fm**, and **Musicbrainz** web APIs, enabling 15+ music recommendation features
- Integrated a **FastAPI Python** backend to incorporate 100+ **ML-generated music recommendations** into similarSongs

Construct - Admin Project Management | ***Golang, TypeScript, PostgreSQL, bcrypt, WCAG, Role-based Access Control***

- Developed WCAG-compliant **React** interfaces using WAVE to ensure the website met W3C **accessibility standards**
- Built secure **password hashing** with bcrypt, **Golang**, and **PostgreSQL** with Supabase to support login credential verification for **100+ employees** across multiple companies

ScholarlySources - Search Peer-Reviewed Studies | ***Python, FastAPI, asyncio, MongoDB, HTTPX***

- Built an asynchronous academic paper collection and search pipeline using **Python, FastAPI, asyncio, HTTPX, and MongoDB Atlas**, enabling **semantic retrieval** from unstructured web content with 5+ filters

Technical Skills

Languages: JavaScript (ES6+), TypeScript, SQL, Python, Go, C#, HTML, CSS
Frontend: React, React Query, Axios, React Router, Tailwind CSS, WCAG
Backend & Data: PostgreSQL, MongoDB, REST APIs, GraphQL, FastAPI, Django, OpenAPI
Testing & Tools: Vitest, Cypress, Git, GitHub Actions, Docker, AWS EC2, GCP, Jira, Agile
